shadows

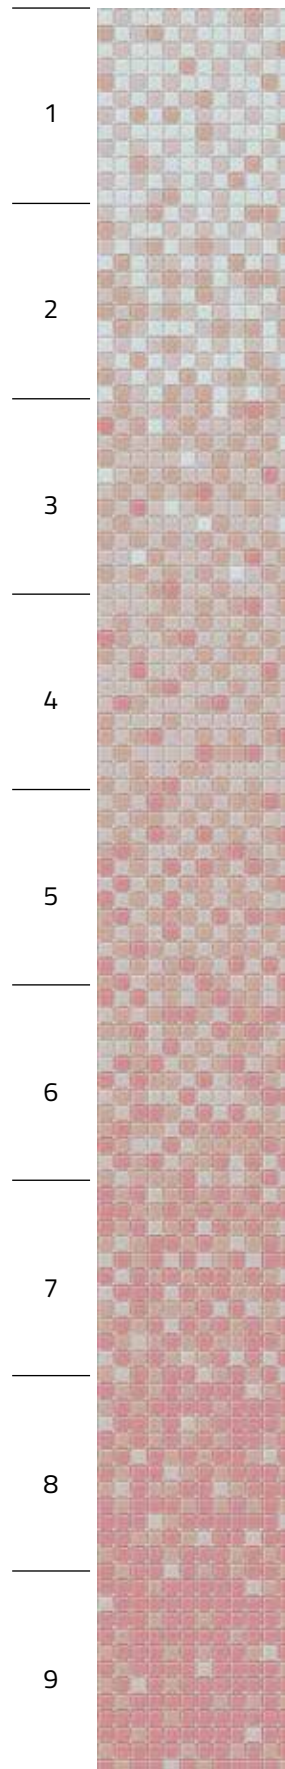

shadows rosa

Mozaika typu SHADOWS kreuje efekt cieniowania, przechodzenia kolorów od ciemnych do jasnych w jednej tonacji. Wysokość i intensywność tego efektu mogą być wybierane dowolnie przez klienta, w zależności od doboru plastrów z układu. Pojedynczy plaster ma wysokość 30 cm.

Shadows mosaic creates the shading effect, in which the colouring of the pattern changes smoothly from darker to lighter within the same monotone colour scheme. The height and intensity of this effect depend on the customer's choice of sheets from the pattern. A single sheet is 30 cm high.

flora

flora

Mozaika szklana Flora to absolutna nowość na rynku światowym! Wzór układa się w niej z kwiatów w trzech rodzajach. Każdy z tych kwiatów będzie pasował do pozostałych, tworząc pełne wypełnienie ściany mozaiką. Doskonałe rozwiązanie nie tylko do wnętrz łazienkowych, ale także do dużych przestrzeni publicznych, eksponowanych ścian w Waszym domu czy biurze. Mozaika sprzedawana jest w plastrach pokazanych na zdjęciach poniżej.

The Flora mosaic is an absolute novelty on the world market! Its pattern is created by the three kinds of flowers. Each of these flowers will match the others and make the mosaic cover the wall completely. The Flora mosaic constitutes an ideal solution not only for bathroom interiors, but also for large public buildings and exposed walls in your home or office. The mosaic tiles are sold in sheets presented in the pictures below.

Wydrukowane materiały nie odzwierciedlają dokładnie koloru szkła. Poszczególne wyroby mogą różnić się strukturą i kolorem. Grubość i wielkość szkła wprowadza zmianę odcienia koloru. Płytki jednokolorowe ze względu na wypał w piecu komorowym mogą różnić się odcieniem i nie oznacza to wady produktu, podobnie jak nieregularność poszczególnych elementów. Wyżej wymienione warunki nie stanowią podstaw do reklamacji lub zwrotu.

The colours of the products presented in our brochure may vary slightly from the actual colour of glass. Particular products may differ in their texture and colour. Changes in a colour tone are related to the thickness and size of glass. Due to their firing in a chamber furnace, one-coloured tiles may differ in tone, which, similarly to the roughness of particular elements, is not treated as a product's defect. The conditions mentioned above will not be considered grounds for a complaint or refund.
